

A Quick Guide to Super Search

Super Search allows you to search for past news items on specific companies. Find the desired company using the Company Lookup/Quick Search box on the home page. Less information entered results in a more successful search. Selecting your subject will bring you to their Company Information page.

The screenshot shows a search form titled "Company Lookup/Quick Search". It includes input fields for "Company Name", "Seafax File #", and "Area Code - Phone" (with two sub-inputs). A "GO" button is present, along with a link for "Advanced Search >>>".

Towards the bottom of the Company Information page, you will see a Super Search Summary box containing a guide to stories published.
